Hiring Team

20four7VA

Re: CPT-11392 — Supply Chain Operations & Data Support Virtual Assistant

Dear Hiring Team,

I am writing to apply for the Supply Chain Operations & Data Support Virtual Assistant position (CPT-11392) with 20four7VA. As a Data & Operations Virtual Assistant with hands-on experience building and maintaining high-volume Excel databases, tracking operational and client data, and supporting cross-functional teams remotely, I am confident I can bring the accuracy, structure, and reliability this role requires.

In my recent role as a Data Entry & Operations Specialist at Springboard, I built and maintained large-volume spreadsheets to track operational metrics, deadlines, and project milestones, while cleaning and validating records to protect data integrity across lead tracking and backend reporting. I regularly used advanced Excel functions, including VLOOKUP/XLOOKUP and Pivot Tables, to consolidate raw data into clear operational summaries — work that mirrors the spreadsheet building, data organization, and forecasting support this position calls for.

Alongside my Excel work, I am proficient with ClickUp for task and project tracking, and with Microsoft 365 tools including SharePoint and OneDrive for organizing shared files and information — both listed as core requirements for this role. My coordination experience with The Church of Jesus Christ of Latter-day Saints further strengthened my ability to manage schedules, generate progress reports, and communicate clearly with leadership across distributed teams, and my time at Ritz in Africa sharpened my accuracy and composure in fast-paced, detail-driven environments.

I would welcome the opportunity to bring this combination of analytical rigor, organizational discipline, and remote collaboration experience to your supply chain operations team. Thank you for your time and consideration — I look forward to the possibility of discussing how I can support your team's data and reporting needs.

Sincerely,

Fredrick Oketcho
